

British Patient Capital (BPC)

BPC is responsible for investing £2.5 billion in equity-related initiatives over the next ten years of which venture and growth fund activities are expected to be a significant part. BPC may invest in evergreen, co-investment or secondary investment vehicles.

Some of the key requirements of this role may include:

- Supporting the Investment Team and gaining an insight into the investment process
- Assist the Senior Investment Managers in the analysis and reconciliation of financial information, including fund reports and accounts
- Working with the administration team to manage and analyse data
- Assist with marketing activity.
- Assist in the due diligence process for potential new investments, undertaking financial analysis and modelling, desk research and background checks.

You will also be working on a specific project.

Project Title: ESG (Environmental, Social and Governance) principles and practises in venture capital fund of fund investment

Scope: Research into;

- ESG best practise in relation to VC investing
- VC institutional investors' requirements
- BPC portfolio venture capital managers approach to ESG
- Portfolio manager's requests of BPC
