

Finance Business Intelligence

The BBB Business Intelligence function sits within Finance but supports the bank wide reporting of KPIs, board level reporting and visualisation of investment data. We deal with Management Information (MI) requests which come from both within the organisation and outside such as FOI and Parliamentary requests. We have a responsibility for the ingest and egress of data from the BBB Data Warehouse.

Business Intelligence (overview briefing)

- a. Data manipulation and data analysis for the various investment programmes which the bank supports.
- b. Visualisation of data / Data enrichment for the data we receive from Delivery Partners
- c. Construction and support of Management Information (MI) requests which arrive from inside/outside the organisation.

Key skills – We are looking for an individual with an interest in data analytics and or data visualisation
