

Guarantee and Wholesale Solutions Structuring Intern

The Guarantee & Wholesale Solutions team originates, structures and manages cash and risk transfer transactions of SME finance portfolios. The team executes transactions with SME lenders such as banks and non-bank financial institutions and seeks to address the funding, security and capital constraints these entities may face that prevent them from increasing their credit activity in the small business sector.

We are looking for an exceptional individual to provide strong support to our analysts and in doing so develop their financial markets skills, by:

- Assisting with the analysis of granular portfolios of SME receivables for potential transactions
- Aiding the preparation of credit proposals
- Shadowing negotiation calls with potential delivery partners
- Understanding legal documentation
- Providing hands on support within the transaction management process

The individual will have the opportunity to gain unique insight and exposure to securitisations, structured finance and other, similar, capital market instruments.
