

Risk and Compliance

The Risk & Compliance function supports the rest of BBB through independent and objective advice and challenge to ensure that the business has an effective risk management and control framework and operates according to its Risk Appetite.

We achieve this by adopting a COLLABORATIVE approach that values:

- Positive engagement
- Constructive challenge
- Independent monitoring
- Objective assessments of risk
- Efficient support

This is an ideal opportunity for anyone wanting to explore the operational risk world. Some aspects that you will be involved with are:

- Development of policy controls and input into our Risk management system – Xactium, a salesforce-based tool
- Liaising with policy owners across the Bank as well as within our own team
- Opportunity to understand our Risk & Control Self-Assessment (RCSA) process and our Risk taxonomy
