

Strategy, Economics and Business Development Economics Intern

The Strategy, Economics and Business Development function support British Business Bank through the overall corporate strategy work, business planning, product development and horizon scanning.

Economists play a leading role in providing the economic support necessary for Business Bank activities including market analysis to identify problems and gaps in the market, working in close collaboration with the strategy team to appraise options for new Business Bank activities and engaging with product teams to evaluate existing activity.

Some of the activities that may be included in this role will be:

- Contributing to the analysis, drafting and quality assurance of the Bank's first Regional Tracker report.
- Producing briefing emails on key external data releases
- Analysis of management information to support economic appraisal assumptions
- Providing ad-hoc analytical support to the Strategy & Economics team
